

About the position

Reporting to the Project Geologist, the successful candidate will assist the Project Geologist with the field implementation and execution of the exploration programs of the company. The Exploration geologist will be responsible for carrying out a variety of geological and operational assignments at the Company's exploration projects. This is an offer for a full-time salaried position that includes benefits.

Interested candidates should send their resume to jobs@redpineexp.com

We thank all applicants for their interest; however, only those selected for an interview will be contacted.

About the company

Red Pine Exploration is a junior gold exploration company listed on the TSX-V that is currently exploring and developing the Wawa Gold Project located 2 km east of the town of Wawa, Ontario. Red Pine offers competitive salaries and benefit packages and provides opportunities for both personal and professional development in a dynamic work environment.

Primary Responsibilities

- Logging and sampling of exploration drill core and geological interpretations from the observations.
- Assist with the tracking of drilling progress and performance on daily basis as needed.
- Conduct inspections of drill sites prior, during, and after drilling has been completed.
- Assist core technicians with geotechnical logging, sample preparation, and the movement and management of core.
- Contribute to geological mapping/prospecting/sampling when required.
- Prepare assessment reports including the creation of maps and figures as required.
- Ensure all relevant QA/QC protocols and mineral exploration best practices are being effectively followed during the completion of project tasks.
- Work in compliance with the Occupational Health and Safety Act and all other applicable government standards and regulations.
- Comply with laws governing mineral exploration and internal company policies and procedures pertaining to the position.
- Perform other duties as assigned.

Qualifications

- Bachelor or Master of Science Degree in Geology or related Earth Science program
- At least two (2) years of experience in mineral exploration including activities like field mapping and core logging
- Registered or ability to be registered with Professional Geoscientists Ontario (PGO)
- Be fully immunized for Covid-19 following the Ontario Government definition of full immunization
- A demonstrated commitment to safety, environment, and community
- Strong organization and time management skills.
- Self-motivated and ability to work alone.
- Good interpersonal and communication skills.
- Able to work in camp setting on a rotational basis.
- Valid Class G Driver's License
- Working knowledge of the MS Office.
- First Aid and ATV/UTV certification would be an asset.
- Knowledge of QGIS, Target and MxDeposit logging software is considered an asset

Working Conditions:

- The position is based at the Wawa Gold Project, which is approximately 2 kilometres east of Wawa, Ontario, Canada.
- This position is rotation-based in a camp setting for accommodations.
